Osman Cansız

Frontend Developer

Istanbul, Turkey / github.com/osmancansiz / osman.codes@gmail.com / 05315185852

I am constantly working on improving my personal development in terms of software along with my education. I am a person who always loves to develop and develop, and wants to do his job as he should. I have been interested in software since my elementary school period and therefore I studied Database Programming in high school. At the University, I continued with Computer Programming and finished with an average of 3.54. I did my best to leave positive traces in my internship and other short-term work experiences.
